Report of 2019 Q3

Institut des Actuaire continues various actions relating to professionalism.

Alongside customary activities, such as answer to AAE by ERM committee, some actions could be of interest to our European colleagues, such as enhancement of training offers.

- Data Sciences for Actuaries certificate will welcome a new session at the end of the year.
- A new session of CERA certification is taking place.
- Institut des Actuaire is now offering to its members the opportunity to participate into a certificate "member of board of an insurance company" addressing legal, financial, as well as practical issues to be faced by an actuary as a board member.

The certificate is organised in partnership with the Institut Français des Administrateurs (French Institute of Directors). Certification is delivered after 6 modules, 2 days each and a final exam.

The first session started last spring and will end up in November. Number of participants is around 15, most of them involved in boards as directors.

Besides providing a strong professional background to actuaries participating in Boards, the secondary objective is to promote to leaders of the insurance industry the interest of having presence of actuaries in Boards.
