

# Proposed RMC Committee Structure

On 4 May 2018 the RMC agreed that it did not at the current time want to create formal sub-committees focusing on e.g. pensions, insurance or investment. However, it still wanted to structure its activities in ways that maximised its work output and its effective interaction with other AAE technical committees. It has therefore established four 'sections' or forums as above who are tasked with coordinating their own practice area-specific workstreams and with liaising with other AAE technical committees when relevant.

Should the level of activity of any of these sections or forums warrant it, it is expected that they would convert to or lead to the establishment of suitable sub-committees or task forces as appropriate
