### Core Syllabus Review

As agreed at the Education Committee meeting in Brussels, DAV volunteered to review the syllabus assessment spreadsheets to specify topics not well covered and specifying a preferred depth of coverage of each topic

The analysis was done in the following way:

- Check and quality assessment of the data available
  - Some feedback was not complete; some data was inconsistent (Spain vs. Catalonia)
- Aggregation of data for one association
  - Compare association vs. university
    - To make it comparable we said:
      - first degree (univ.) = comprehension (assoc.) and
      - second degree = analysis
- Calculation of Minimum, arithmetic average (integer) and arithmetic average (rounded)

On this basis, the following files are attached:

- An excel file with all summarized results for every learning objective
- An excel file with the results for every association
- Three presentations with bar charts for Minimum, arithmetic average (integer) and arithmetic average (rounded) regarding every learning objective

*Kurt Lambrechts and Henning Wergen*
