**Vision and Values of the AEE – PC Perspective**

# PC's Vision and Values

One of the AAE's objectives to contribute to the wellbeing  
of the society

## How does the PC contribute?

- how does the PC contribute to the well-being of society, and
- how does the PC address our concern for the public interest.

# Ideas

- The PC addresses the concern for public interest by **supporting EIOPA** and other stakeholders giving advice based on actuarial principles.
- We give **input to European pensions policy**. IORP II and PEPP are two recent examples.
- We show our public interest in **advising** as an **independent body**, with no strings attached to parties who sell this product.

# Ideas

- Our profession stands for **accurate calculated** retirement benefits, we do long-time projections to show impacts of actions today, we help to avoid envy between generations. In our profession most people trust, we have no commercial background that we have to sell products, we are **independent** and non-committed.
