Data Science & Data Ethics e-Conference

29/30 June 2020 @ **actuvew**

Organised by the EAA - European Actuarial Academy GmbH

Sponsored by **Deloitte**, **OLIVER WYMAN**, **RG&A**, **50 SCOR**

As the leading provider of high-class actuarial education and CPD activities in Europe, the **European Actuarial Academy (EAA)** will be hosting its first virtual conference with the aim

- to present up-to-date solutions to technical problems,
- to share best practices and personal insights
- as well as to offer a forum for actuarial and data science experts.

Initially planned as an onsite event the EAA is very happy and proud to run this special conference in an online environment to take into account the COVID-19 pandemic and the resulting travel restrictions.

The actuarial focus has changed significantly over the last couple of years. Computational power is increasing with exponential growth. In addition more and more data is available. This combination puts the actuarial profession into a position where a new understanding has to be developed on today's possibilities of actuarial science and the ethical implications of it. The new role of actuaries within big data and ongoing digitalisation is not yet fully defined. Best practice experience sharing and exchange of ideas is needed!

Program

The EAA is delighted to offer all interested actuaries and other experts a forum for knowledge exchange: On 29 and 30 June 2020, the first EAA e-Conference "Data Science & Data Ethics" will be broadcast here on actuvew. The two-day programme combines keynote speeches from well-known experts with food for thought and selected talks from professionals through a call for papers.
