Belgium

Paris, march 9, 2022

Object : Education Committee - Assessment of the AAE Core Syllabus

Dear President, Dear Henning Wergen,

There are three categories of members in the association: associate members, qualified members and fully qualified members (among fully qualified members, « agrégé » members are a subcategory satisfying additional requirements).

The first rank, «Associate member», is obtained after graduating from one of the 10 training centers below:

- ⇒ Certificat d'expertise actuarielle,
- ⇒ Collège des Ingénieurs,
- ⇒ Conservatoire National des Arts et Métiers,
- ⇒ ENSAE (Institut Polytechnique de Paris),
- ⇒ ESSEC,
- ⇒ Sorbonne Université (ISUP),
- ⇒ Université de Bretagne Occidentale (EURIA),
- ⇒ Université Claude Bernard Lyon 1 (ISFA),
- ⇒ Université Paris Dauphine,
- ⇒ Université de Strasbourg.

Each of these training programs is compelled to check that its graduated students acquired the skills contained in the French Core Syllabus (and consequently the European Core Syllabus).

The French association controls the compliance of the training program to the Core Syllabus on a regular basis, and training programs must notify changes in their structure to the Institut des actuaires, which can, if necessary, anticipate the control.

During this compliance check, each training programs support their adequacy on the core syllabus and produces a full report on the governance, description of the program, (sample of exams), examination process, list of teachers to support their adequacy with the core syllabus.

In complement to support the report, they provide a spreadsheet linking its learning objectives to the elements of the French and European Core Syllabus, with indications regarding Bloom's taxonomy. Some additional meeting between the team and the training institutions are then conducted on site to check if the elements that are provided are correct.

The last full auditing process has been conducted in March 2022.

Sincerely Yours.

Olivier Lopez
Education Committee member
member of the standards and international committee of Institut des actuaires
