

AAE Artificial Intelligence & Data Science Working Group

Teleconference 2 May 2022, 11.00 – 12.00

Participants:

Kivisaari, Esko	Chairperson
Attias, Ivana Kolovrat	
Hirz, Jonas	
Miehe Philipp	
Olympio, Anani	
Overby, Pernille Jul	
Senatore, Claudio	
Tautan, Bogdan	
Theodosiou, Marinos	
Wilhelmy, Lutz	

1. Opening of the meeting

Esko opened the meeting and welcomed the participants.

2. Minutes of the previous meeting

Minutes of the meeting on 10 February 2022 were approved.

3. Papers

Esko updated on the insurability paper and promised a new version for the task force during the week (which he failed as he forgot his laptop to his office while spending the rest of the week in Brussels). Anyway, the paper is going forward and should be available for the Working Group fairly soon and then head to the Board for approval. It was discussed whether the paper could be made more topical with the inclusion of some discussion on whether insurance is high risk or not, in reference to the AI Act. The task force will look at that.

The 'What should an actuary know' paper is still not very advanced but work on it is continuing.

Discussion continued on the idea of building on the first paper something more advanced on insurance versus social inclusion/exclusion. EIOPA has some activity on this and also the UK FCA has researched price discrimination. This would certainly not be a topic of just this Working Group but the AAE Insurance Committee would need to be involved. Esko will check the situation.

4. Data Science Challenge

Jonas updated the Working Group of the advances. He was asked to write a note describing what should happen at each stage to make sure the project will succeed.

5. Any other business

None.

6. Closing of the meeting and our next meeting

Esko closed the meeting and will doodle a slot for the next .
