

## CAA 2026 Conference – Indicative Themes & Topics

The Conference will cover actuarial, financial and broader risk-related topics that are highly relevant to the actuarial profession and where actuaries can make a meaningful contribution to business, policy-making and society.

Indicatively, the Conference may cover the following themes:

**Main theme title:** The evolving role of the actuary in a changing risk and financial landscape

### 1. Artificial Intelligence, Data & Technology

- Use of advanced analytics in actuarial practice
- Data quality and control frameworks
- Automations and process transformations

### 2. (Re)Insurance & Capital Management

- Solvency II developments and upcoming regulatory changes
- Reinsurance optimisation and capital efficiency
- Use of internal models and ORSA developments
- M&A activity and its actuarial implications
- Emerging risks and their impact on capital requirements

### 3. Pensions, Social Insurance & Long-Term Sustainability

- Social insurance system sustainability and pension adequacy
- Demographic ageing and labour-market challenges
- Inter-generational equity and reform design
- Transition from DB to DC / hybrid arrangements
- Investment strategy and risk management for long-term liabilities

### 4. Health, Mortality & Longevity

- Sustainability of health insurance systems and medical inflation
- Managing epidemic and systemic health risks

### 5. The Actuary of the Future

- Evolving role of the actuary in business and policy
- Skills of the future: beyond technical excellence
- Communication, judgement and influence
- Professional standards, ethics and public trust
- Attracting and developing the next generation of actuaries

The above list is indicative and not exhaustive.
